KC 12 Max 3

Main Applications

- Steel Fabricator
- Metal Contractors
- Shipyard

Advantageous

- KC 12 Max 3 is a new generation, innovative machine with a body structure systematized for different types of oxy-fuel / plasma cutting and automatic welding work
- There are three major parts to the system - the advanced motorized carriage, a cutting torch unit and the plate track and accessories
- The heavy duty driving mechanism of KC 12 Max 3 is not affected by intense heat and fluctuating voltage, therefore ensuring steady travel
- A "zero reduction drive system" is also employed within the mechanism to eliminate any knocking from backlash, noise and vibration
- Equipped with Iwatani Quick valve for easy and quick operation and especially repetitive cutting jobs
- The Speed Control utilizes an exclusive Double Cone Stepless Speed System, which functions with a condensor motor rotating at regular speed to prevent heat and voltage problems
