

Mig Mag Inverter CC/CV Xi 300

Xi 300

Main Applications

- Furniture
- Car body repair
- Caroseri
- On site welding
- Vehicle body maker
- Light fabricator

Advantageous

- New CC / CV Technology for better welding quality and result and easy to use
- High duty cycle, suitable for light to medium welding jobs
- Welding current and voltage digital display for easy adjustment
- Multiprocess for MMA and MIG MAG welding process
- Recommend for "Vehicle body maker" welding and welding on thin sheets
- Suitable for aluminum welding from 0.8 - 1.0 mm

Specifications	Xi 300
Welding range	60 - 300 A
Load voltage	17 - 29 V
Open circuit voltage	51 V
Welding current at 80 % duty cycle	300 A
Welding current at 100 % duty cycle	268 A
Input power	11.0 KVA
Input current	17.0 A
Input phase	3 Phase
Main voltage, Tolerance	380 V, ± 15 %
Frequency	50 / 60 Hz
Weldable steel wire	0.8 - 1.2 mm
Weldable aluminum wire	0.8 - 1.2 mm
Power factor	0.93
Index protection	IP 23
Insulation class	F
Cooling type	F
Dimension (L x W x H)	650 x 320 x 580 mm
Weight without accessories	36 Kg
