

## Rotabest TCT Cutter depth 50 mm

### Main Applications

- Steel fabricators
- Shipyard
- Power plant
- Boiler

### Chip Breaker System

1. Pre Cutter
2. Middle Cutter
3. Post Cutter

### Universal Shank suitable for

- Mag Drill with Weldon
- Mag Drill with One Touch

### Advantageous

- Drilling 5 times faster than twist drill
- For heavy to light jobs
- High performance toothing with pre, middle and post cutter, double bevelled
- CAD-optimized cutting geometry for steady flow of chips, uniquely shaped chip grooves to prevent chip jamming,
- Optimum regular chip breaking - smooth and excellent cutting capacity, good chip production at each tooth, regular chip flow
- Rapid drill core removal by ejector pin
- Instant centering, no running off center with good concentricity also suitable for NC and CNC Machine

- Minimum cross section of chip removing surface - easy cutting, low torque, low energy consumption
- High tool hardness due to optimum raw material and special heat treatment made it long life and suitable for difficult materials
- High tenacity of cutter, specially graduated hardness - lower risk of tool break especially under rough working conditions
- Industrial scale manufacturing by state of the art CNC technology, results optimum function, best reproducibility and constant quality

Item Code	Item Size	MoQ
